SPARE PARTS

We maintain an unparalleled inventory for the systems declared obsolete, or at end-of-life, by the OEM. These components can help extend your system's operational life, reduce costs, avoid forced outages and minimize downtime.

FIELD SERVICE

Our Field Services include Health Checks for Turbine Control Panels, Excitation & LCI, Troubleshooting & Outage Support, TIL Review & Implementation, HMI or <I> Replacement-in-Kind, EEPROM Backup Service, and NERC Compliance.

TRAINING

We offer a variety of courses carried out by knowledgeable instructors and practicing field engineers. You have the option of predefined seminars or fully customized classes to suit your specific requirements.

UPGRADES

If your original system doesn't have the current features you require, GTC can upgrade your technology to a more recent legacy system for a fraction of the cost of a new system from the OEM. If you decide upon an OEM upgrade, GTC would be interested in acquiring your pull-out system and spares inventory.

TESTING & REPAIR

Our Test & Certification and Repair Services, available for many of the product lines we sell, include a detailed Technical Report and Warranty Certificate, with an unmatched certification period of up to six years.

GTC™

Control Solutions

SERVICE BEYOND THE SALE.

Call GTC

In addition to performing functional tests on numerous circuit boards with fully energized panels, we have a state-of-the-art repair facility to ensure all work is performed in a clean and controlled environment.

Through our **24 Hour Emergency Hotline**, our team is available to you around the clock to address your most urgent needs.
