## Work Management Planning and Scheduling

**Three opportunities to attend this two day course:**  
January 22 - 23, May 15 - 16 and September 10 - 11

Maintenance planning and scheduling is the cornerstone to empower improved reliability. It enables more effective preventive maintenance, stores, utilization of craftspeople, maintenance cost control, and much more.

In this 2-day course\* you'll learn all aspects of best practices in efficient and effective planning and scheduling. From concept to practice you'll learn how to receive problems, issue defined solutions and well-planned work packages.

The topics in this course align with SMRP's Body of Knowledge Work Management Pillar. 1.2 CEUs.

*\*Course adapted onsite may have a longer duration.*

## Materials and Spare Parts Management

**Two opportunities to attend this two day course:**  
March 6 - 7 and December 11 - 12

Maintenance materials are a large part of a plant's operating costs and not having what's needed when it's needed, impacts productivity, reliability, morale, and the bottom line.

This 2-day course\* provides real solutions to materials management and inventory. You'll take away knowledge and tools to dramatically improve your spare parts and supplies.

The course topics align with SMRP's Body of Knowledge Work Management Pillar. 1.2 CEUs.

*\*Course adapted onsite may have a longer duration.*

## Shutdown Turnaround Optimization Program™ (S-TOP)

**Two opportunities to attend this two day course:**  
January 24 - 25 and September 12 - 13

Many industries spend the majority of their maintenance budget on shutdowns. Turnarounds are where significant downtime is spent.

This 2-day course\* will teach you how to stay on budget and minimize downtime using a 6-step process that includes countdown actions, tools, and resource optimization.

The course topics align with SMRP's Body of Knowledge Work Management Pillar. 1.2 CEUs.

*\*Course adapted onsite may have a longer duration.*

## Root Cause Problem Elimination™

**Two opportunities to attend this two day course:**  
April 24 - 25 and November 6 - 7

This 2-day course\* teaches you a structured approach to problem elimination. Our training focuses on not just analyzing a problem but actually eliminating it.

Through class exercises you'll learn a method for solving problems, thinking process and how to implement and manage a Root Cause Problem Elimination program.

The topics of this course align with SMRP's Body of Knowledge's Equipment Reliability Pillar. 1.2 CEUs.

*\*Course adapted onsite may have a longer duration.*

## ➡ Equipment Reliability Week

April 8-12, 2019

Individuals: \$1,200  
Groups of 10 or more: \$9,000

Join us for 4.5 days of Preventive Maintenance Knowledge building.

Topics include:

- Clearing the confusion in your Preventive Maintenance strategy
- Cost Control and Asset Management
- Essential care and Inspection techniques for operators and new technicians

**Space is limited to 30 people**, bring your operations and maintenance team members for the most effective implementation at your plant.

## ➡ IDCON Conference

September 23-26, 2019

This conference provides essential learning in all aspects of Reliability and Maintenance. You'll hear how others have applied best practices in reliability and maintenance to improve their facilities. Network with peers, Reliability leaders, and top reliability and maintenance suppliers.

**Space is limited.** For more information visit [www.idconevents.com](http://www.idconevents.com)

## Need training On Site?

IDCON works as a catalyst, trainer, and coach assisting your organization to improve the reliability and maintenance practices that impact production and maintenance costs. We do this by assessing your current processes, developing an action strategy with you, and transferring our knowledge to your people.

Contact us today **919-847-8764** to discuss your goals.
