

Take the right decision from the start - it can **not** be undone!

Robust Danish Wind Turbine Design

- The Viking household wind turbine is based on the robust and well-known Danish concept
- The turbines are type approved and meet the international standards
- The turbines are delivered with a 2 year warranty on all components
- The Viking wind turbines are compatible with stand-alone systems / off-grid systems
- The Viking wind turbine can collaborate with existing energy solutions such as solar, diesel generator and storages solutions

Easy installation and maintenance

The Viking turbine is designed for easy transport and installation: 3 complete turbines in a 40" container

The tilt tower gives possibility to erect and derect the turbine
Operating time for lay down: from start to end is 15 minutes

With the three blades design, the turbines have the same majestic look as the large MW turbines

Convinced!

Viking wind has surveillance on all installed Viking turbines

The surveillance system keeps track at the conditions on the turbines, operations, production of kwh and availability etc.

All Turbines in Denmark have an availability above 95, most of which are above 98

We will do the utmost to cooperate with you and to make sure that your dreams - and therefore our dreams, will come true
