Dropsafe Nets

The patented Dropsafe Nets are safety devices that securely enclose and tether overhead fixtures to prevent dropped and falling objects.

Benefits

- Instant safety solution for your personnel
- Easy to install, no tools required
- Fully encloses and tethers fixture
- Retains loose or dislodged items
- Products available for a wide range of fixture types

How The Dropsafe Net Works

The patented Dropsafe Nets are safety devices that enclose and tether overhead fixtures (e.g. lights, beacons, speakers, self-retracting lifelines, CCTV cameras, anodes, pipe clamps, etc.) located above personnel or important equipment.

Where To Use

- Fixtures located above personnel
- Fixtures on mobile equipment (e.g. crane booms, derricks, drill rigs, draglines and shovels)
- Fixtures in potential impact zones of mobile equipment
- Fixtures and mountings exposed to vibration wear and fatigue
- Fixtures prone to oxidation and galvanic corrosion
- Fixtures located above important or expensive equipment
- Fixtures located in areas difficult to access for maintenance or inspection
- Securing items being replaced, maintained repaired in situ
