

## Resins and Grouts application

We offer these services to all industries and machinery in any part of the world

The Alphatec teams are highly specialized in installing and grout all kinds of machinery: Compressors, Hypercompressors, Pumps, Diesel Engines, Gas Turbines, all kind of skids, an more, providing high quality materials and the best solutions following the API RP 686, ACI and GMRC norms.

## Resin Injections

Resin injection can be very effective in reducing vibration levels

The development of vibration problems in machinery is greatly enhanced by unbound construction joints in the foundation, grout failure and bad anchor installation. Alphatec provides the best engineered solution, where epoxy resins are injected after inserting high tensile strength bars. This way we tightly sew together the foundation, ensuring a monolithic behaviour and leaving it in even a better shape than new.

## Alphatec Engineering

Epoxy resins  
for machine grouting  
and structural repair

## New Machinery Grouting

## Foundation Repairs

SINCE 1977

THE ALPHATEC ENGINEERING  
GROUP OF COMPANIES  
SPECIALISES IN THE REPAIR OF  
MACHINERY FOUNDATIONS,  
AND THE RE-ALIGNMENT AND  
RE-GROUTING OF ROTATING  
AND RECIPROCATING  
MACHINERY.
